

FlexGRIP® Catheter Securement Device

The FlexGRIP® device is suitable for securing and stabilizing catheters from the M-Drain® series, as well as other catheters ranging from 5-18 French. It is made of soft materials and provides an easy-to-use solution.

The soft, low profile retainer and pre-mounted fixation leash securely holds the catheter in place, with an additional strap that locks the soft clip to avoid accidental loosening. The adhesive is skin-safe and hypoallergenic, designed to prevent MARSI (medical adhesive-related skin injury) for optimal patient comfort.

FlexGRIP® comes in 2 sizes to ensure a perfect fit for every catheter: 5-11Fr and 11 to 18Fr.

Features:

- Air pillow technology ensures tight catheter fixation without impacting flow rate
- Hypoallergenic and skin-safe adhesive designed to prevent MARSI
- Pre-mounted fixation leash for ease of use
- Soft materials and low profile for enhanced patient comfort
