

M.Drain[®] Drainage Catheter Family Catalogue

M·DRAIN® FAMILY

Family of Drainage Catheters and Accessories

Mermaid Medical offers a wide range of drainage catheters and accessories designed for efficient drainage with safety as our top priority.

Our wide-ranging series of products includes a variety of drainage catheters, guidewires, and other accessories to support individual needs. In addition, a wide range of French sizes and catheter lengths are available to match procedural requirements.

The M.Drain® Series from Mermaid Medical provides physicians and hospitals with safe and functional catheters and accessories for a one-stop-shop experience.

M.Drain[®] Multipurpose Drainage Catheters

- M·Drain[®] Nephrostomy Drainage Catheter
- M·Drain[®] Single Step Drainage Catheter Mini Pigtail

M.Drain[®] Percutaneous Introducer Set

M.Drain[®] Centesis Catheter

Drain-Lok Catheter Securement Device

Amplatz[®] Guidewire

Mermaid Medical Group is a privately owned company established in 2007. With our Nordic roots and headquarters in Denmark, we value cooperation, helpfulness, and openness. We develop, manufacture, and distribute medical devices to hospitals and end users across Europe, the U.S., and Asia. We primarily work within solutions to diseases in the vascular system as well as other devices used in interventional radiology. We strive to be the preferred partner for manufacturers as well as hospitals and healthcare professionals so that together we can help even more patients.

TABLE OF CONTENT

• M.Drain[®] Single Step Drainage Catheter – Locking and Non-locking • M·Drain[®] Biliary Drainage Catheter – Locking and Non-locking

M•**D**rain[®] **Multipurpose Drainage Catheters**

The M.Drain[®] series from Mermaid Medical provides physicians and hospitals with safe and functional catheters and accessories for a one-stop-shop experience. The M·Drain[®] catheter design has been specially developed to enhance patient care while also providing physicians with an improved ease of use.

All M.Drain[®] catheters are multipurpose and can therefore be used for a variety of drainage applications, including but not limited to abscess, nephrostomy, biliary, and centesis.

Catheter placement is performed using either a Single Step or Seldinger technique.

When using the M·Drain[®] series, you are guaranteed state-of-the-art catheters and accessories, making purchasing of catheters and accessories a one-stop-shop experience.

All M.Drain® Catheters Incorporate These Enhanced Design Features: • Large "skived" oval side holes promote increased flow and reduce

- clogging.
- Slimline reinforced tapered tip with "Anti-Accordion" design for smooth entry.
- Internal diameter of hub and catheter will always match for maximum flow.
- Hydrophilic coating reduces friction, which allows for easy catheter introduction.

M.Drain[®] Single Step Drainage Catheter – Locking and Non-locking

Features all standard M.Drain® catheter design elements with or without a reliable pigtail locking string.

M•Drain[®] Nephrostomy Drainage Catheter

Designed for Seldinger technique catheter placement. The catheter comes with a reliable pigtail locking string.

M.Drain[®] Single Step Drainage Catheter – Mini Pigtail

Ideal drainage catheter for small areas or smaller patients.

Pigtail diameter approximately 10-15% less than the standard single step catheter.

M.Drain[®] Biliary Drainage Catheter – Locking and Non-locking

A radiopaque marker identifies the location of the nearest drainage hole to aid in catheter placement.

M.Drain[®] **Percutaneous Introducer Set**

The M·Drain[®] Percutaneous Introducer Set is used for single puncture percutaneous access for safe and easy guidewire or catheter placement in non-vascular procedures.

The M·Drain[®] hydrophilic coated coaxial introducer system features a 21G/22G x 15 cm trocar or chiba needle to minimize tissue trauma.

The set includes a 60 cm guidewire in either nitinol or stainless steel with curved goldplated tip for easy visualization.

Features:

- Tapered tip design on coaxial catheter system for smooth, atraumatic placement of guidewires up to 0.038".
- Smooth transition between 4F dilator and 6F sheath eases insertion.
- Embedded x-ray marker enhances visibility.
- Centimeter markings on needle for accurate placement.

M•Drain[®] **Centesis Catheter**

The M·Drain® Centesis Catheter is an over the needle catheter designed for small abscess fluid aspiration and short-term drainage procedures.

Both the catheter and needle are designed to minimize invasive trauma.

The echogenic needle tip aids in ultrasound visibility while the clear needle hub allows for visual flashback confirmation. The M·Drain® Centesis Catheter is made with radiopaque and kink resistant material.

Features:

- Two large oval "skived" holes to aid in maximum drainage flow and reduction of clogging.
- Unique tapering provides smooth transition between needle and catheter for easy and precise placement.
- Coated catheter for easy insertion.
- clinicians from fluid leakage.

• Porous vent plug allows air to exit catheter during insertion and protects

Drain-Lok Catheter Securement Device

The Drain-Lok catheter securement device for percutaneous catheters and tubes can safely anchor drainage catheters from the M·Drain® series as well as all other percutaneous catheters ranging from 5 French to 18 French.

It features a hydrocolloid adhesive with an outer adhesive cover. The hydrocolloid can absorb superfluous exudates and reduce removal trauma.

It is conformable and can be easily molded into place to enhance patient comfort and minimize leakage.

Drain-Lok comes in two sizes to ensure perfect fit for every catheter: 5Fr to 12Fr and 12Fr to 18Fr.

Amplatz® Guidewire

Amplatz[®] Guidewires are designed to provide strength and stability when facilitating placement of vascular and non-vascular catheters.

All guidewires are packaged in a circular dispenser to enable easy flushing of the guidewire.

Features:

- High torque-control for easy placement.
- Smooth transition from rigid core to coil tip provides excellent maneuverability.
- 3.5 cm or 7.5 cm floppy tip.
- Stainless steel or nitinol for clinical flexibility.
