

Soft Tissue Biopsy Catalogue

SOFT TISSUE BIOPSY

Mermaid Medical offers a range of soft tissue biopsy needles designed to obtain high quality tissue samples with safety and efficiency in mind.

Our series of products include an automatic and semi-automatic option to support individual needs. In addition, a large range of gauge sizes, needle lengths, and throw lengths are available to match procedural requirements.

Mermaid Medical's range of soft tissue biopsy products includes diagnostic solutions for listed applications:

-  **KIDNEY**
-  **LIVER**
-  **LUNG**
-  **LYMPH**
-  **MUSCLE**
-  **PROSTATE**
-  **SPLEEN**
-  **THYROID**

Mermaid Medical Group is a privately owned company established in 2007. With our Nordic roots and headquarters in Denmark, we value cooperation, helpfulness, and openness. We develop, manufacture, and distribute medical devices to hospitals and end users across Europe, the U.S., and Asia. We primarily work within solutions to diseases in the vascular system as well as other devices used in interventional radiology. We strive to be the preferred partner for manufacturers as well as hospitals and healthcare professionals so that together we can help even more patients.

M·Biopsy® Automatic Disposable Biopsy Needle

The M·Biopsy® fully automatic disposable biopsy instrument is a user-friendly biopsy device designed to provide a high-quality biopsy sample.

It has been designed with focus on ergonomics to secure a comfortable grip, independent of device orientation. The left and right loading sliders secures a high-quality sample without compromising device fire power.

The M·Biopsy® coaxial needle comes with a sharp trocar tip and a transparent needle hub. The needle features an additional blunt stylet to minimize damage to tissue, vasculature, and organs.

Features:

- Ergonomic and lightweight one-handed design to secure comfortable grip, increase control, and minimize needle movement during imaging.
- 2-stage left and right loading button provides reduction of force needed to cock device.
- Comes with 11mm or 22mm throw length to meet a variety of clinical needs.
- Available as a single device or as a set with a coaxial needle for improved procurement and inventory control.

M·Biopsy® Semi-automatic Disposable Biopsy Needle

The M·Biopsy® semi-automatic biopsy instrument is a lightweight and adjustable device with the flexibility of a semi-automatic mode of action. The full loop scissor design provides a solid grip, leading to easy, single stage cocking and excellent maneuverability during the procedure. Color-coding on the inside of the handle loops makes identification of accurate gauge size easy.

In addition, its lightweight design combined with a wide range of gauge sizes and needle lengths also makes it ideal for CT-guided biopsies.

The M·Biopsy® coaxial needle comes with a sharp trocar tip and a transparent needle hub. The needle features an additional blunt stylet to minimize damage to tissue, vasculature, and organs.

Features:

- Adjustable throw length (10mm and 20mm) to accommodate individual procedural needs.
- Available as a single device or as a set with a coaxial needle for improved procurement and inventory control.
- Lightweight solid one-piece design makes it ideal for CT-guided biopsies.
