

## Ultra-Pro II™ Disposable Replacement Kits

The Ultra-Pro II™ guides instruments according to on-screen software guidelines.

Ultra-Pro II™ features a larger funnel for instrument insertion and accepts a full range of device sizes.

Features:

- Increased clinical confidence with improved needle visualization during real-time imaging.<sup>1, 2</sup>
- Reduced needle manipulation, resulting in less tissue trauma and less patient discomfort, which ultimately leads to reduced procedure time.<sup>2</sup>
- Efficient and reproducible biopsy technique ensures confident outcomes compared to freehand.<sup>2</sup>

Easy-to-read gauge sizes on the inserts.

Larger tab for improved quick-release function, allowing easy detachment of the needle from the transducer.
