

## Scholten Novatome™ Endomyocardial Biopsy Forceps

A biopsy design proven by over 30 years of successful use.

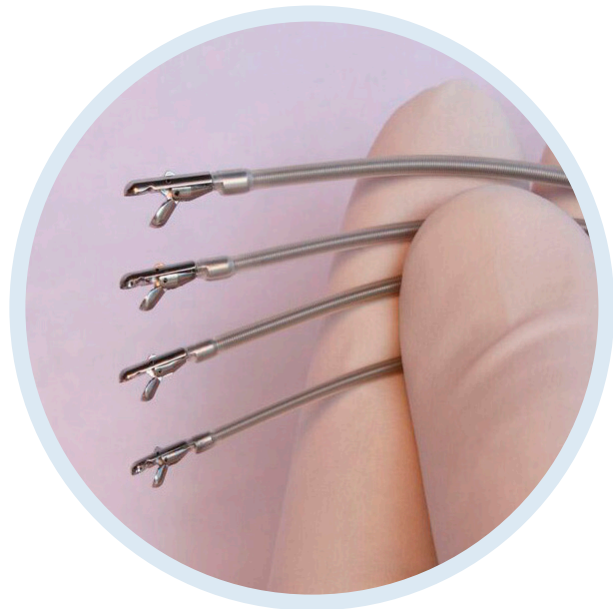

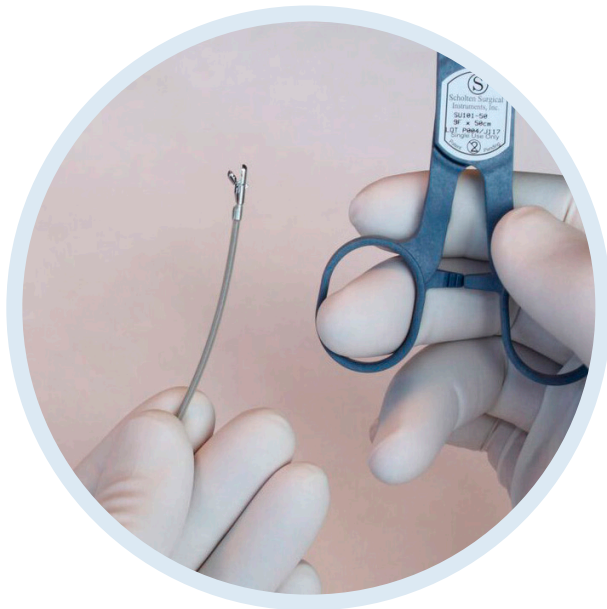

Sharp and steerable advantages in a disposable format.

Scholten Novatome™ is specially designed to acquire maximum specimen size for more accurate pathology results. The two-ringed handle easily adapt to any thumb position. The handle provides a solid instrument feel.

With a reputation for its ease of positioning and heart rhythm feedback, Scholten Bioptomes have earned high praise. The Novatome™ single use, disposable unit eliminates the risk of contamination. Scholten model is the best choice for safety and precision. Clearly, with a pedigree of more than 30 years of clinical experience, the disposable model Novatome™ will continue to set the standard worldwide.

Features:

- Perfect balance of flexibility and stiffness offering precise navigation and positioning
- Formable distal curve
- Familiar locking finger ring actuation handle
- Super precision machining
- Provides precise cutting edge alignment for every cut
- Single action cutting jaw (single moving jaw) provides superior cutting force
- Unique hollow ground cutting edge for superior sharpness
