

CANYON Microwave Ablation System

A New Portable Generation - SURETIP® & Xpheretip® Antennas

Liver

Thyroids

Kidneys

Lungs

About Mermaid Medical Group

Mermaid Medical Group is a privately owned company established in 2007. With our Nordic roots and headquarters in Denmark, we value cooperation, helpfulness, and openness.

We develop, manufacture, and distribute medical devices to hospitals and end users across Europe, the U.S., and Asia.

We primarily work within solutions to diseases in the vascular system as well as other devices used in interventional radiology.

We strive to be the preferred partner for manufacturers as well as hospitals and healthcare professionals so that together we can help even more patients.

About CANYON Medical

CANYON Medical is a Chinese company founded in 1986 and based in Nanjing. From here, they manufacture a range of microwave equipment of their own design, specializing in microwave ablation, which they have been working with for more than 20 years. Over 200.000 cases in China alone have been successfully completed with CANYON Medical's ablation system.

20 years with over 200.000 successful cases

Note: Coagulative performance by 14G Xpheretip® carried out in ex-vivo porcine liver. The actual ablation dimensions in in-vivo tissues may differ from such static laboratory results.

Features:

- A new portable solid state system to ensure stable microwave output
- An interactive and sensitive touchscreen with adjustable power, time, and temperature which makes it very user-friendly
- Continuous and pulsed modes are available for different clinical options
- Innovative interface which allows the user to monitor and provides instant feedback for safe use

Sharp needle tip and thin diameter makes the placement easier due to less friction

Allows for easy handling of antenna and flexibility regardless of image modality

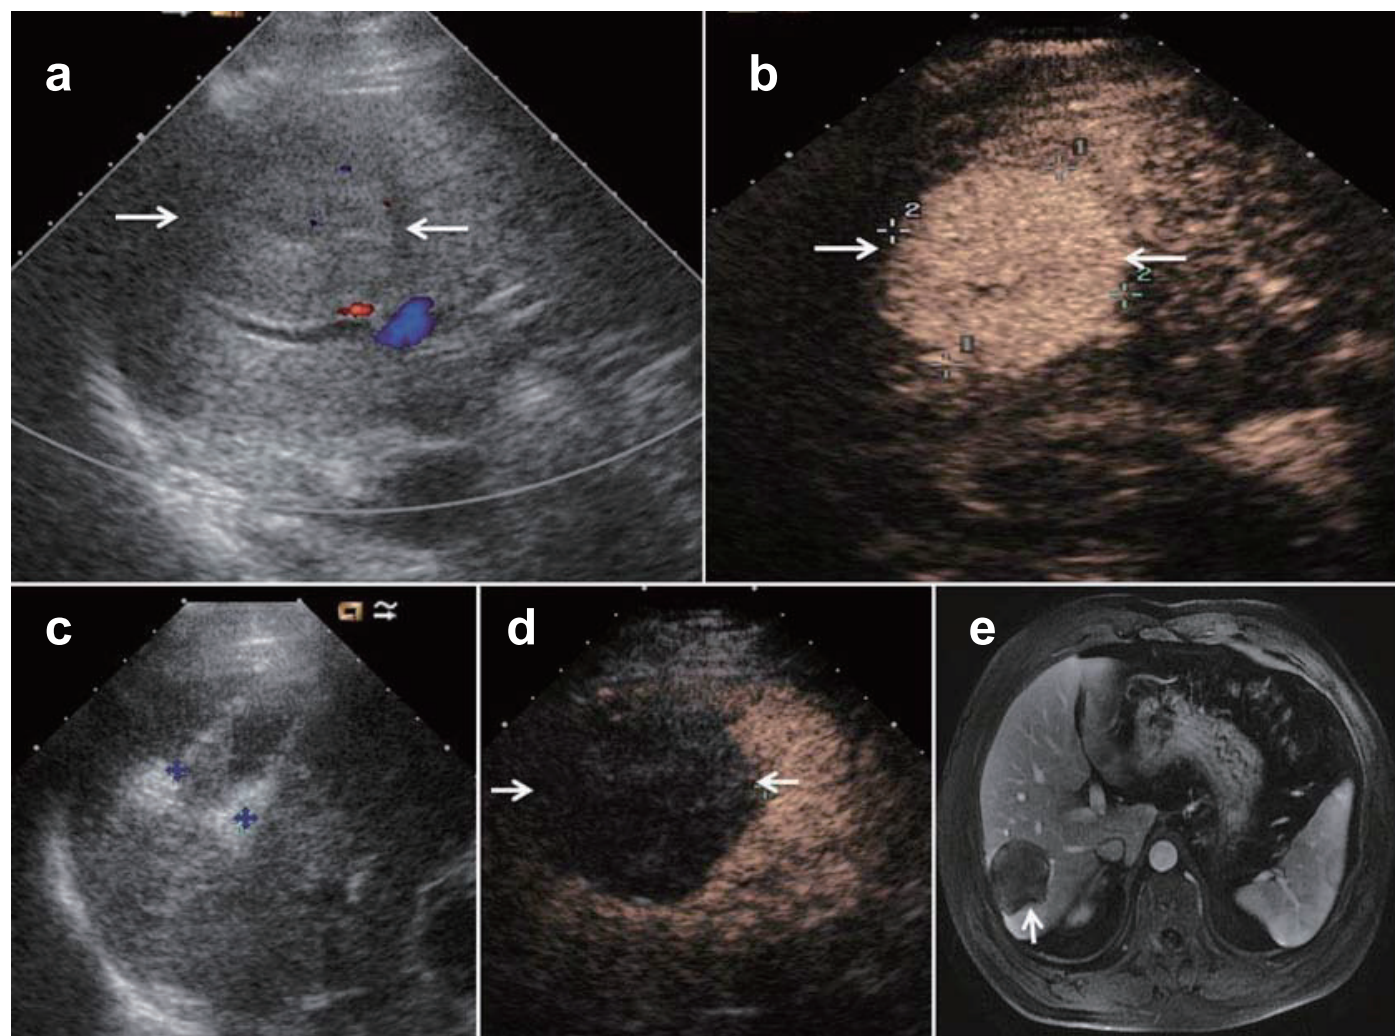

Features:

- High performance material to ensure better connection and strength
- Unique shaft coating material to avoid tissue adhesion
- Sharp needle tip and thin diameter, making it less invasive
- Internally water cooled antenna with intelligent temperature control
- Signal enhancement design for better visibility under CT or ultrasound guidance
- High efficiency detachable cable, unique enhanced connection with the antenna

Features:

- Patented radiation control technology and fully cooled antenna that guarantees an ultraspherical shape of the ablation zone
- Enhanced product safety that gives the benefit of strength and stiffness
- New coating which gives the user a perfect and smooth puncture movement, also avoiding tissue adhesion in an efficient way
- Echogenic design that gives the user enhanced visibility
- Available in 14G and 15G in different lengths

Benefits of Microwave Ablation

Microwave ablation can generate larger ablation zones in shorter time with less sensibility to heat sink effect. Moreover, MWA radiates all biological issues, such as bone, lung, charred or desiccated tissues. Additionally, multiple antennas can be placed to treat simultaneously for large tumors or multifocal lesion. With CANYON New Generation Microwave Ablation System, the achieved ablation zone can be uniform, homogeneous, and predictable. In addition, a choice of antennas and customized settings provides the user with unique opportunities for clinical diversity during treatment.

- (a) Preablation conventional ultrasound (US) scan shows a hypoechoic lesion with blood supply (arrows).
- (b) Contrast-enhanced US before MWA shows tumor enhancement in arterial phase with the size of 5.5 x 4.7 cm. (arrows).
- (c) Conventional US shows two microwave antennas (mark) placed in the tumor.
- (d) Contrast-enhanced US shows no enhancement of the ablation zone at 12 months after treatment (arrows)
- (e) MRI scan obtained 21 months after ablation shows hypoattenuating ablation zone (arrow) without enhancement.

Custom made trolley for use with CANYON MWA Generator

Ordering and Specifications

CANYON Microwave Ablation Generator

Ref	H-1
Frequency	2450 Mhz
Display	7 inch Touchscreen
Energy Output	5-100W
Time Setting	1-30 Minutes
Working Power	100V-240V 50-60 Hz
Weight	9.8 kg
Size	42x39x22cm

SURETIP® Antennas

Ref		Frequency	Diameter	Active Tip	Total Length	
KY-2450B-4	**	2450 MHZ	18G	3 MM	70 MM	<div>* Angeled handle</div> <div>** Straight handle</div>
