

MedEasy

Semi-automatic spring-loaded biopsy system

MedEasy semi-automatic spring-loaded biopsy system has an ergonomic and lightweight design, making it easy to navigate through CT or ultrasound procedures. It features an adjustable penetration depth displayed at the system and is designed in an innovative special ergonomic shape.

Features:

- Adjustable penetration depth (10mm or 20mm)
- Lightweight compact instrument specially designed to perform biopsies under CT scan guidance
- Blunt Tip Stylet included with coaxial introducer helps reduce the risk of damage to vasculature or other vital structures
